

SYSTEM

- Light a small single desk with two presenters.
- Light weight fixtures can be hung from suspended ceilings.
- Available in non-dimming and dimming configurations.

LAYOUT

This package of equipment is designed to cover a single small desk with 2 presenters sitting side by side or a small 2 person interview set.

The Type B backlights should be no more than 6' above the Talent's head. The center Type A fixture should be centered between the Talent from 8' away and 7'-8' off the ground. The two remaining Type A fixtures at the front should be crossed from each side at the same height and distance as the center front fixture. Adjustable hangers are available if required. If mounted in the proper configuration an aggregated light level of 90-120 foot candles above ambient light will fill the Talent zone. With all fixtures "full-on", power consumption is less than 900 watts.
